### **Come hear the arguments for socialism!**

Capitalism on a world scale faces a massive crisis. Greece, Spain, Ireland and Italy are examples of just a few countries that are on a path to a severe crisis of capitalism. This is the worst crisis of capitalism the world as ever seen.

New Zealand is about to enter even more economic turmoil. This is a consequence of the knock on effects of an unfolding economic slump in China and Australia. The capitalists answer to their crisis is more austerity and mass unemployment.

The recent election of Jeremy Corbyn as the leader of the British Labour Party points the way forward for the New Zealand Labour Party. New Zealand Labour needs to rediscover its socialist roots and openly challenge capitalist imposed austerity with a bold socialist programme that will enthuse workers to actively get involved in the Labour Party and fight for socialism.
